Notes from our September 27th meeting

After a great dinner and introduction of guests, our speaker was Brad Warren of Global Ocean Health.

Brad is a part of "Working Group on Seafood and Energy". He spoke about a view on Washington Initiative 1631 and explained that it is possible to have both healthy fisheries and affordable fuel.

The Working Group has criteria for a successful emissions policy to protect marine resources, provide capital to help people and companies become the solution, ensures we get what we pay for, and links up with policies elsewhere to build toward a global-scale solution with harmonized policies. He talked about the urgent need to limit carbon pollution and the impacts this has on sea life. The key features of I-1631 is Price-and-invest to help people become the solution, invest to help people cope with the impact, and to invest to help fossil fuel workers transition to new careers. If you have questions you can contact Brad by email at brad@globaloceanhealth.org

New Business

Deane read a letter that NCC would like to send to the mayor and the president of Seattle City Council about the Burke Gilman Trail saying that safety is our main concern and a fatality will occur the way it's set up to be built. It was moved and seconded and voted "yes" by the membership that the letter be sent.
